

Independent Media Platform to Challenge Main Stream Media

Freedom.social to provide platform for
independent media to bypass censoring

July 12, 2017, Denver, Colorado - Denver-based Freedom.social has announced the launch of its new platform for Independent Media to report the factual truth of what is occurring around the world without the concern for being censored.

[Freedom.social](#) is similar to YouTube and Facebook, however Freedom.social is a worldwide platform for Independent Media to post videos and articles, and media outlets are able to take advantage of free IPTV and free WebRTC. With WebRTC, live multi-party video conferencing interviews can be recorded and saved, as well as distributed. IPTV allows Independent Media to broadcast live from satellite, IP camera, PC, smart device or DVR and save as a video, and distribute. The services are 100% and Freedom.social pays Independent Media to utilize the platform.

Freedom.social is asking legitimate Independent Media outlets and YouTube channels that are currently being censored on other platforms to create a free account today.

The CEO of Uncensored Freedom Inc., Kent Lewiss describing the platform said,

“Independent media now has a platform to report the truth on what is occurring worldwide and provide a platform to for people worldwide to be free from national corporate media propaganda. “

Freedom.social has multiple different platforms built into one platform which includes a digital currency exchange called FreedomCoin Exchange. FreedomCoin Exchange features several new digital currencies and pays Independent Media and all end users to post, like, share, and refer people to the

Freedom.social platform. Early Independent Media adopters stand a legitimate opportunity to greatly financially benefit.

Lewis added, "Freedom.social is not a platform for people to fight over left vs. right politics, the litmus test of Freedom.social to determine if someone is removed from the propaganda is if someone believes the false left right paradigm and simply wants to live free and be a decent person".

The Freedom.social mission is to tell the truth, pay Independent Media and all end users to spread the truth, utilize groups to collectively formulate solutions, and collectively implement and carry out action plans to save our country and the world.
